2018 DongshaTrip
Dongsha
Natinonal
Park Guide
東沙環礁
國家公園
Dongsha Atoll National Park

Dongsha Island usually be forgotten by many Taiwanese because of its unique location. There are so many beautiful natural environment and culture. It is also a very important military place. Dongsha can even compared with Maldives.

In the era of high level of environmental protection, because the beauty of the island, government established a national park of sea in January seventeenth, 2007, make great effort on protecting Dongsha and the coral reefs that can enhance curiosity of people in Taiwan. But Dongsha National Park is still a military place, only offical staffs can arrive in the beginning. With many time's cooperation of many institutions, now not only official staffs but also the geologists and university students can arrive. Very appriciate that I can join this trip this year, wish can let more and more people know Dongsha, and always cherish the nature.

Dongsha—Nature

Because it is not easy to arrive Dongsha, it saves the natural environment. Snorkeling on sunny days along the shell sand, there are so many seaweeds! At night you can see tens of thousands of hermit crabs on the sand and land. Watching sun rise and sun set is an activity you can not miss everyday!
